DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Corle et al. Corle et al teaches an optical system (Fig. 4) for providing a useful light beam, having, at least one optical component (117) which attenuates a useful light fraction with a first linear polarization state less strongly than a useful light fraction with a second linear polarization state different from the first linear polarization state, and a compensation unit having a transmission plate (128) which is introduced into the useful light beam path inclined to the plane perpendicular to the optical axis by a prescribed angle of inclination, and attenuates the useful light fraction with the first linear polarization state more strongly than the useful light fraction with the second linear polarization state (see col. 6, line 62-col. 7, line 17).
